CAREER OBJECTIVE

Aspiring Full Stack Developer with hands-on experience in building scalable web applications using React.js, Node.js, REST APIs, MongoDB, and Firebase. Strong foundation in Data Structures, Object-Oriented Programming and SQL, with a passion for developing high-performance backend systems and responsive user interfaces. Seeking to contribute to innovative product development while continuously learning modern technologies and cloud-native architectures.

EDUCATION

Bachelor of Technology in Computer Science and Engineering	Expected-2027
Pranveer Singh Institue Of Technology , Kanpur	79.82% (upto 5th Sem)
Class 12th - Guru Nanak Modern School (CBSE)	2023
Percentage: 83%	
Class 10th - Guru Nanak Modern School (CBSE)	2021
Percentage: 95%	

SKILLS

Programming Languages: Java, C++, Python, JavaScript, SQL
Frontend Technologies: React.js, HTML5, CSS3, JavaScript, Responsive Web Design
Backend Technologies: Node.js, REST APIs, HTTP, JSON, API Integration, JWT Authentication
Databases: MySQL, MongoDB, Firebase
Tools & Platforms: Git, GitHub, VS Code, Postman, Jupyter Notebook, Firebase
Core subjects: Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems
Cloud & Web Concepts: AWS Cloud Fundamentals, Scalable Web Applications, Client-Server Architecture
Soft Skills: Communication, Leadership, Teamwork, Analytical Thinking, Adaptability, Collaboration

PROJECTS

1. Real-Time Messaging Platform — React.js, Node.js, Socket.io, MongoDB, JWT	GitHub
• Developed full-stack real-time chat application with scalable architecture. • Implemented Socket.io for real-time messaging and instant notifications. • Designed responsive UI using React with dynamic state management. • Implemented secure JWT authentication and MongoDB-based user management. • Built live online user status tracking and message synchronization.	
2. AI-Powered Intelligent Trip Planner — Gemini AI, React.js, Firebase, TailwindCSS	GitHub
• Designed scalable trip-planning system using modular architecture. • Integrated Gemini API for dynamic recommendation generation. • Implemented Firebase authentication and secure access control. • Optimized backend data retrieval for low-latency responses. • Followed reusable coding and clean architecture practices.	
3. Chat Bot Recommender — HTML, JavaScript, Gemini API	GitHub
• Built intelligent recommendation chatbot using Gemini API. • Designed dynamic query-response flow using JavaScript. • Developed responsive frontend with optimized rendering	

CERTIFICATIONS

- Completed AWS Cloud Practitioner Essentials (AWS) certification.
- TCS iON AI for All Initiative – AI and Cybersecurity Awareness.
- Completed HTML, CSS, JavaScript and Python for Data Science certification from Infosys Springboard.

ACHIEVEMENTS

- Solved 200+ DSA problems demonstrating structured problem-solving ability.
- Built multiple user-focused products solving real-world challenges.
- Strong understanding of translating user requirements into scalable digital solutions.
